SUMMARY

HR professional with experience in HR business partnering, employee relations, employee engagement, and workforce analytics. Skilled in HR reporting, attrition analysis, Excel, and Power BI, with a strong foundation in HR & Business Analytics. Passionate about leveraging people analytics and data-driven insights to support strategic HR decisions.

Skills

- **Power BI:** Power Query, Data Modelling, DAX, Dashboards.
- **SQL (MySQL):** Joins, Subqueries, Window Functions, Aggregations.
- **Microsoft Excel:** Advanced Excel, Pivot Tables, Dashboards, Advanced Excel, VLOOKUP, XLOOKUP, INDEX-MATCH, Formulas, Data Cleaning, Reports and Analysis.
- **Data Visualization:** Key Performance Indicators, Charts and visual metrics, Power BI Dashboards.
- **Statistical Analysis:** Exploratory Data Analysis, Hypothesis Testing, Linear and Logistic Regression, Statistical Analysis.
- **Python:** Pandas, NumPy, Matplotlib; Data Visualization, Data Analysis.
- **Soft Skills:** Stakeholder Management, Business Understanding, Communicating Business Insights, Decision-Making.
- **HR Skills:** HR Policies, People Analytics, HR Reporting, HR Business Partnering (HRBP), Attrition Analysis, Employee Engagement, Labor Laws.

Education

- **University of Hyderabad** — MBA in Human Resources Management and Business Analytics. - CGPA: 8.27/10 (Gold Medalist) August 2023 – June 2025
- **Anurag Group of Institutions (JNTUH)** — B.Tech in Electronics and Communication Engineering - CGPA: 8.76/10 August 2015 – June 2019

Experience

Management Trainee – Human Resources (HRBP), Cyient — Hyderabad August 2025 – Present

- Reviewed 500 + employee queries and support tickets to identify trends, patterns, and process gaps, improving HR operational efficiency.
- Developed an Excel-based attrition prediction model using logistic regression to identify early warning signs and enhance risk detection, implemented as a pilot project, analyzing 200 employees attrition risks..
- Interpreted HR policies and business processes to generate actionable insights and support the Connectivity Business Unit as a BUHR, with a head count of nearly 1900+ employees.
- Analyzed Associate Satisfaction Improvement Plans (ASIP) reports for two major Business Units, as part of HR analytics, to enable data-driven workforce insights.
- Assisted the Cynchrony engagement team in planning and coordinating nearly 4+ employee engagement activities to improve morale and workplace culture.
- Managed 10+ pool actions by supporting separation processes for service line bench employees exceeding defined bench period thresholds. Also, maintained 3+ monthly HR reports, attrition analyses, and dashboards.
- Conducted 50+ resignation discussions with employees, gathered feedback and required inputs, and analyzed key reasons contributing to attrition trends.
- Conducted regular HR floor connects with employees to understand concerns, gather feedback, and improve employee experience.
- Participated in UAT testing of CY-AI chat Bot, from an HR perspective by validating nearly 10 HR policies and 30 query scenarios, contributing to improved HR query resolution, operational efficiency, and successful sign-off.

- Collected, organized, and analyzed deployment and change management data using MS Excel to support operational reporting and decision-making.
- Monitored and analyzed 1,200 + software deployments and change requests to identify trends, bottlenecks, and release performance metrics.
- Developed and maintained release tracking reports in Excel to monitor KPIs, reduce process errors by 95%, and improve data accuracy.
- Applied data-driven insights to streamline deployment workflows, improving operational efficiency and achieving 90% on-time releases.
- Communicated insights and status reports to cross-functional stakeholders, supporting coordination, planning, and decision-making.
- Raised and managed ServiceNow change requests for deployments, coordinating with stakeholders to secure approvals and ensure timely release execution in compliance with change management processes.

Projects

1. Employee Attendance & Leave Patterns Dashboard

[View Project](#)

Tools: MS Excel, MySQL, Power BI, DAX, Data Cleaning, Data Visualization

- Developed an interactive HR attendance and leave patterns, dashboard by processing 1,000 + employee attendance records.
- Implemented advanced DAX calculations to derive WFH(11.15%), SL(2.01%) etc by day of the week and by using the month filters.
- Automated data preparation in Power BI using Power Query by consolidating, transforming, and standardizing multi-source datasets for HR reporting and analytics.
- Analyzed attendance and leave patterns to generate workforce insights and support data-driven HR decision-making.

2. HR Analytics Project: Employee Sentiment Analysis

[View Project](#)

Tools: MS Excel, Python, Data Cleaning, Data Analytics, HR decision making.

- Applied NLP techniques using VADER on a sample of 10,000 employee Glassdoor reviews, achieving 84% accuracy in sentiment detection.
- Identified key themes such as "work-life balance", "leadership", and "career growth" using LDA topic modeling.
- Discovered insights by mapping sentiment scores across departments to optimize HR strategies and address areas for improvement.

Certifications

- **SQL for Data Science** — Hands-on practice with joins, aggregate functions, and querying relational databases (MySQL).
- **Data Analysis and Visualization using Power BI** — Power Query, data modeling, DAX, AI visuals, dashboards.
